1 WEB DESIGN AND DEVELOPMENT

In every 3 seconds a new web site is being hosted on the internet. So you can understand the competition on the internet and compare between different services qualities rendered to you. We apply technology with innovation and responsibility to Design the right strategies for your website to be presented in a high quality.

Whether your business requires a Web site development from the beginning, or your current site requires a re-design or has little or no activity, we can provide you with needed services. Through understanding your business activities deeply, we will design and develop a suitable web site to your business as a whole.

Design and Development

DOT Technology creative team believes that your web presence should accurately reflect and identify the nature of your business, producing the greatest visibility and generating the highest impact on your targeted markets. So, we optimize our clients' web performance.

Database Development

DOT Technology provides comprehensive and accurate database management solutions. Regarding to the fact that your clients` are the most important assets your company has and you have to manage their database, we provide you with our unique technology and comprehensive methodology to ensure a successful data integration projects about your clients.

2 WEB HOSTING

Our hosting environment offers you reliability to keep you visible 24/7/365, understanding your growing needs, and flexibility to meet your changing operational requirements.

E-Mail: DOT Technology hosts thousands of corporate email boxes. We offer infrastructure support and a personal account management which is not commonly found in other environments.

Domain Registration: DOT Technology Staff can assist you when you register a domain name or transfer one from a non cooperative host.

Site management: Regarding to the fact that, you need to deal with a steamed and an authorized company to guarantee effective and efficient level of performance at reasonable cost. **DOT Technology** has been managed its clients` web sites since day one and our clients` rely on us in house programming resources.

4 EMAIL MARKETING

E-Mail Marketing: using e-mail marketing in the business world today becomes a necessity not a luxury. With regard to our awareness of this fact, we provide e-mail marketing services according to your business needs. We have different e-mail marketing solutions for you whether it will be web promotions, product announcements, newsletters or customers' personal information messages in order to assist you in achieving your targets such as saving time, building customers relationships and increasing sales.

Advantages of Online advertising

Worldwide exposure: The World Wide Web on the Internet can be accessed by millions of people all over the world where there is an internet access. Your web page will have a wider exposure than your advertisement in any daily newspaper.

Low Cost: Compare our offers` with any other competitor that can give you a world wide color graphic exposure in a short turn.

No waiting for the "next issue" to be published: You can be 'Online' in hours/days instead of weeks or months with newspapers and yellow pages.

6 SYSTEM INTEGRATION

Data Networking Solutions

Nowadays, speed, reliability and capacity of network data are important criteria in the world of digital communications. Internet has become a vital business tool for modern enterprises and now of course your voice calls may use the same network as your data. For these reasons, it is vital that you are 100% confident in your network infrastructure and the company that designs and installs it for you.

DOT Technology designs, installs and maintains of the local area networks (LAN) and wide area networks (WAN), providing both on-site and 24 hour telephone support. Our highly skilled teams and trained people are able to help you to address the broad needs of your network, help you to boost network performance and thereby improve your organization's productivity and efficiency.

We offer comprehensive portfolio of network products from the world leading Manufacturers` with whom we have long standing and close partnerships only.

Voice Telephone Solutions

DOT Technology is able to tailor business communications solutions to suit your requirements from a small key system to corporate IP based network. By careful reviewing of systems availability from our top three partners and selecting the best one which fulfill our clients` needs. We are able to provide you with the most cost-effective and reliable solutions.

Through matching solutions available today with the convergence of voice and data on the same network all new ways of sharing information become possible. **DOT Technology** proud of being able to provide its clients` with cutting edge converged systems at any size and great deal with experienced companies in this field.
